MATTHEW WADDELL

Lead Front End Developer

@ waddellmp08@gmail.com   Nacogdoches, TX

SUMMARY

Driven and self-motivated Senior Developer with strong experience in Typescript, JavaScript, and React. Skilled in building appealing interfaces and writing clean, efficient, and scalable code. Passionate about the industry and committed to the journey of making quality applications. Strong collaborator with experience working with others to create meaningful software. Searching for a challenging and rewarding role to contribute my skills to a fast-growing company.

EXPERIENCE

Lead Front End Developer

PayiQ

2020 - Present   Remote (US)

Led a small team of React developers to create an engaging customer facing financial application from scratch. Used cutting edge technologies to build quickly and efficiently. Collaborated with Backend Developers, Designers, Product and Project Managers daily to ensure product alignment.

- Designed and developed a modern frontend financial application.
- Built extensible user interfaces with React and Typescript.
- Used Vite to manage development tooling and configuration.
- Supported multiple languages using i18Next.
- Created unit tests using ViTest and Mock Service Worker.
- Crafted component stories using Storybook and Ladle.
- Experienced using state management packages such as React Query.
- Used code splitting and lazy loading to imporove code performance.
- Completed backend tasks involving C# microservices and REST APIs.
- Good understanding of JWT and cookies authentication mechanisms.
- Exposed to CICD using Azure Pipelines.
- Participated in code reviews and pair programming sessions.
- Used Git for version control.
- Managed stories and bugs with Azure DevOps.

Frontend Developer

Sway Medical

2018 - 2020   Fort Worth, TX

Worked on medical software applications ranging from administrative to customer facing. Collaborated closely with external teams such as Billing, Customer Support, and Sales.

- Developed and supported an admin portal with .NET Core MVC.
- Created razor templates using C#, JavaScript, and CSS.
- Collaborated with Sales, Marketing, and Billing teams to create features.
- Set up quote automation for lead generation.
- Created sales and onboarding dashboards for internal reporting.
- Completed company rebranding efforts with all platforms.
- Managed public marketing website.
- Used serverless Azure Functions for creating dynamic sales integrations.
- Exposed to Entity Framework.
- Solid understanding of Git.
- Wrote SQL queries to gather reporting data and build features.

Developer

Software Agency

2018 - 2018   Fort Worth, TX

Developed hundreds of customer CMS websites for a professional web agency in a high-speed work environment.

- Developed custom websites using Wordpress.
- Experienced with Sketch design software and Adobe Illustrator.
- Created web pages using PHP, CSS, JavaScript, and MySQL.
- Contributed to a custom in-house CMS using Laravel and Vue.
- Worked daily with Project Managers to complete tasks.
- Regularly worked on reported bugs.
